EDUCATION

University of Delaware	Newark, DE
<i>Bachelor of Computer Science, Cybersecurity Minor</i>	May 2023

EMPLOYMENT HISTORY

Pico Quantitative Trading	New York, NY
<i>Software Engineer</i>	June 2023-October 2025

- Developed ultra-low latency feed handlers in C for market data normalization, delivering normalized book updates within microseconds
- Wrote and maintained client and server-side code, implementing comprehensive regression testing using Python to ensure robust performance and reliability
- Worked with both TCP and UDP data feeds spanning binary exchange specific data protocols, as well as standard data protocols such as FIX and FAST
- Triaged production service issues by coordinating between field and engineering teams, providing updates within hours of the incident

EXPERIENCE

University of Delaware, Department of Computer & Information Sciences	Newark, DE
<i>Teaching Assistant</i>	August 2022-June 2023

- Lead or assisted in leading a class of around 80 students through a structured activity in the fundamentals of programming
- Held office hours to offer students one-on-one assistance with course material

PROJECTS

C++ Orderbook

- Building a representation of an orderbook using C++ for the backend logic, including adding and modifying orders, order executions, and grouping orders by symbol
- Uses a terminal user interface library called FTXUI to present menus for the user to interact with to add/modify orders as well as a display that shows orders for a symbol and their information in a detailed manner

SKILLS

Programming Languages: C, C++, Python
Operating Systems: Windows, MacOS, Linux
Software: Word, PowerPoint, Wireshark, Vim/NeoVim, GDB, Git, Jira
